

Written Submission to the Board of Education

To Whom it May Concern,

I recognize the struggle our Board faces walking the financial tightrope that is handed down from the Provincial Government. However, I firmly believe that raising classroom sizes is outside the scope of best practice, and is extremely detrimental to student learning. There needs to be another way to trim the bottom line. Young learners need more 1:1 support. Period. We pay for it now, or we pay for it later when children who are struggling, average, or need enrichment, slip between the cracks and need Resource Support or additional help from Student Services. Please consider other options before making this change. Thank you for considering this point of view.

Sincerely,
Amanda MacCaskell
