

The Redesigned Curriculum

CAREER EDUCATION *A lifelong journey*

A person's career is considered their journey through life, and career education encourages students to pursue this journey in personal, meaningful and goal-oriented ways. Educated citizens in today's ever-changing world are open to multiple career-life possibilities for the future and are flexible and able to adapt to emerging opportunities that fit their overarching values and aspirations.

The **career education** curriculum is designed to help students from kindergarten to Grade 12 learn how to effectively manage their life journey towards several possible preferred futures. Through purposeful career-life development, students learn to recognize their evolving interests and strengths, refine their learning goals, and apply this self-knowledge to the exploration of career-life possibilities. Career-life development is a lifelong process of self-discovery, growth in competence, and learning from experiences in educational, work-related, and personal life contexts.

Redesigned Curriculum: Know-Do-Understand

All areas of learning are based on a “**Know-Do-Understand**” model to support a concept-based, competency-driven approach to learning. In this model, three elements work together to support deeper learning: **Content (Know)**, **Curricular Competencies (Do)**, and **Big Ideas (Understand)**. BC's new curriculum design enables a personalized, flexible and innovative approach at all levels of the education system. All areas of learning have been redesigned using this model.
