

Remove a iOS Config Profile

If you had the SD42 wireless profile previously configured on your iPhone, iPad or other Apple iOS device, you may have need to remove the config profile from your device if you need to setup your device again from scratch.

You can remove the profile by following the process below.

1. Open the Settings App
2. Press on 'General'
3. Scroll down and press on 'Profiles'
4. Press on the 'SD42-Onboard' profile
5. Press on 'Delete'
6. Enter Device Passcode if prompted
7. Press on 'Delete' again to verify and finish the process
